## LIMITED WARRANTY

Adesso provides a one year limited warranty for all of its products against defects in material and workmanship.

During this period, Adesso will repair or replace any product which proves to be defective. However, Adesso will not warranty any product which has been subject to improper freight handling, shipping abuse, neglect, improper installation or unauthorized repair. The warranty will not cover products installed with components not approved by Adesso and products where the sealed assembly trace has been broken.

If you discover a defect, Adesso will, at its option, repair or replace the product at no charge to you provided you return it during the warranty period with freight charges pre-paid to Adesso. Before returning any product, you must obtain a Return Merchandise Authorization number (RMA). This RMA # must be clearly marked on the outside of the package you are returning for warranty service. Be certain to also include your name, shipping address (no PO Boxes), telephone number, and a copy of the invoice showing proof of purchase in the package.

User Guide

## DESCRIPTION

### WIDE COMPATIBILITY & MULTI-PURPOSE:

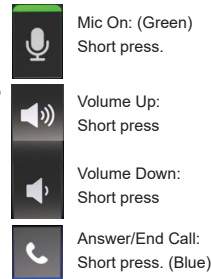

Wide compatible with Windows 11/10/8/7/XP/Vista, Mac OS X 10.6 and later. Great ideal for online courses, call center and conference calls.

## GETTING STARTED

### PUSH TO TALK:

The microphone will only transmit audio when the push to talk button on the inline controls is pressed down and will have a green LED illuminate indicating live transmission. Once the button is released, audio will stop transmitting and the LED will turn off.

The user's hand effortlessly navigates the volume control buttons and answering or ending a call with a simple press.

### Adjustable Microphone:

Tilt the microphone slightly upwards, pointing towards your mouth. Experiment with angles to find the best position for clear and crisp audio capture.

### Comfort Fit:

Position the earcups over your ears, ensuring that they cover the entire ear. The ear cushions should create a seal without pressing too firmly against your head.

## TROUBLESHOOTING

### •What if I'm unable to connect the headset plug to the computer?

If you are not able to connect the cable of the headset to your computer, you can use the adapter included: USB-C to USB-A.

### •What if I hear no sound through headphones after clicking the push to talk button?

If you do not hear sound through your headphones, make sure the sound on your device is not muted and turned up.

### •What if I am not sure the push to talk is working well while the button is pressed and held in?

The LED besides the push to talk button will illuminate green indicating live transmission. When the button is not being pressed, there will be no LED illuminated to show there is no audio being transmitted.
