LIMITED WARRANTY

Adesso provides a one year limited warranty for all of its products against defects in material and workmanship.

During this period, Adesso will repair or replace any product which proves to be defective. However, Adesso will not warranty any product which has been subject to improper freight handling, shipping abuse, neglect, improper installation or unauthorized repair. The warranty will not cover products installed with components not approved by Adesso and products where the sealed assembly trace has been broken.

If you discover a defect, Adesso will, at its option, repair or replace the product at no charge to you provided you return it during the warranty period with freight charges pre-paid to Adesso. Before returning any product, you must obtain a Return Merchandise Authorization number (RMA). This RMA # must be clearly marked on the outside of the package you are returning for warranty service. Be certain to also include your name, shipping address (no PO Boxes), telephone number, and a copy of the invoice showing proof of purchase in the package.

User Guide

GETTING STARTED

CONNECTING THE HEADSET

Connect via USB-C

1. Plug the USB-C connector into your computer USB-C port.

Connect via USB-A

1. Plug the USB-C connector into the USB-A adapter.
2. Plug the USB-A connector into your computer USB-A port.

Note: Only use the USB-A adapter with the provided headset.

HEADSET FIT

Adjust headset by sliding headband open or closed on both sides.

ADJUSTING THE MICROPHONE BOOM

1. Microphone boom rotates 130 degrees. Wear it on left side. For the best music experience, we recommend wearing the headset with the microphone on the left. Left/Right indicators can be found on the side of the headset.
2. Adjust flexible microphone boom location to capture voice better.

How to use Push To Talk?

Instantly transmit your voice with push-to-talk streamlining communication and enhancing collaboration. Simple and intuitive, it enables flexible control of the microphone for different scenarios.

Get started with Push To Talk

To get started, open any application or answer any phone call that uses your microphone. When you are ready to transmit your voice, press and hold the push to talk button on the control box while speaking. Once you are ready to end your audio transmission, let go of the button and all audio will stop transmitting from your microphone.

A Green LED will light up when the Push To Talk button is being held

How to use the Answer/End call button?

To use the Answer/End call button, you simply press the answer/end call button when receiving a call to answer, once you have answered the call you will use the push-to-talk button to transmit your voice. When you are finished with the call, you will press the answer/end call button to end the call.

A Blue LED will light up when on a phone call

Troubleshooting

1. My microphone is not working.
 - Make sure you are holding the push to talk button
2. I can't hear any sound.
 - Please make sure your volume is not set to mute.
3. I keep receiving a microphone is muted error, even when pressing the push to talk button.
 - Please check your Microphone properties to unmute.
4. My PC/Laptop does not have a USB-C port, how do I use the headset?
 - Depending on which ports you have, use the USB-A or AUX adapters.
5. I can't find the driver to download.
 - This headset is plug and play with no extra driver needed.
