

CP-90AS

12-Digit Printing Calculator and Adding Machine

■ Important!

This is an adding machine and DOES NOT function like a standard desktop calculator. For example, to do the equation $4 - 2$, you would need to press "4" then "+" then "2" then "-" then "equals" to get the right answer. Tutorials and examples are provided in the detailed instruction manual.

■ Major Upgrades

This model comes with state-of-the-art upgrades: an easy to load paper mechanism, curved ergonomic buttons, an on/off switch, and a detailed instruction manual with examples.

■ Clear Display

Featuring a 4 inch screen, this calculator supports up to 12 digits - allowing you to calculate large numbers at a time. The screen is also very clear and easy to read, relieving strain on your eyes.

■ Two Power Sources

An AC adapter is included so you never have to worry about running out of power. However, if you want to travel, this calculator is also for you. It supports 4 AA batteries (not included), giving you the option of mobility.

■ 2-Color Printer

A 2-Color Ink (Blue and Red) printer included within helps you organize your calculations. This calculator uses an industry standard replaceable ink roller, the IR-40T, making the ink easy to replace.
