

Features

Mobile Keyboard

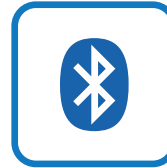

Easy Dock Access

Multiple Viewing Angles

Stylus Holder

Bluetooth Wireless Technology

Ultra Slim Aluminum Design

Scissor-Switch Keyboard

Rechargeable Battery

The Adesso Compagno 3S Bluetooth keyboard and case are the perfect companions for the Samsung Slate PC XE700T1A. The ultra slim aluminum base keyboard is built with scissor-switch keys, which offer the same great tactile feel as a laptop and have a near-silent response. While protecting your Slate PC from the unexpected, the contemporary faux leather case (that accompanies your keyboard) provides multiple viewing angles for easier typing, Internet browsing, and video viewing. The design of the Compagno 3 case also converts into a standalone case, which allows you to store the stylus inside the case as well as connect to your slate PC dock instantly.

■ Mobile Keyboard

The Compagno's keyboard can be removed from the case as a stand-alone device so you can position the keyboard wherever it is convenient. When you are done, just set the keyboard back into the secure magnetic slot of the case and you are ready to go.

■ Easy Dock Access

This case offers several convenient slots for you to connect to your Slate PC dock without removing the Slate PC from the case. Simply put the keyboard aside and connect to the Slate PC dock instantly for extending available ports and charging up your Slate PC at the same time.

■ Multiple Viewing Angles

The Adesso Compagno 3S case offers you the flexibility to use the case without its keyboard, providing additional viewing angles so that you can relax and view slideshows, videos, and movies without the hassle of holding up the Slate PC.

■ Stylus Holder

Compagno 3S has a secure stylus holder that stores the stylus or pen inside the case as your perfect companions.

■ Bluetooth 3.0 Wireless Technology

Bluetooth® 3.0 wireless technology offers your Slate PC keyboard 30 feet of wireless freedom, high battery efficiency, and higher security encryption.

■ Ultra Slim Aluminum Design

Measuring 6mm in thickness, the slim aluminum base design offers a beautiful keyboard that is easily accessible and portable.

■ Scissor-Switch Keys

The scissor-switch keys offer the same great tactile feel you get when using your laptop—silent, crisp, and agile.

■ Built-in Li-ion Polymer Rechargeable Battery

This keyboard is equipped with a built-in Li-ion Polymer rechargeable battery that is easily recharged by connecting the Micro USB cable to your computer.
