

AKB-140SB

Desktop Keyboard with Smart Card Reader

The Adesso AKB-140SB is a low-profile keyboard designed for both efficiency and security. Featuring a built-in smart card reader, it enables seamless authentication for secure access to sensitive systems and data. Its slim design ensures a comfortable typing experience while saving desk space, making it an ideal solution for offices, healthcare environments, and secure workstations.

Built-in Smart Card Reader

The built-in Smart Card Reader brings extra security and ease for banking transactions, identification systems, secure web applications, and secure logon. Due to its secure nature, smart card keyboards are extensively used by industries like banking, healthcare, e-commerce, and government agencies. This device supports multiple international standards including ISO7816 for IC card standard, PC/SC 2.0 for Windows Smart Card standard, Microsoft WHQL, EMV for Europay MasterCard Visa Standard and USB-IF CCID standard.

Low Profile

Low-profile membrane keys offer a slim, streamlined design for keyboards, providing a quieter and smoother typing experience. These keys require minimal force to press, reducing finger fatigue and enhancing comfort during extended use. Ideal for those seeking a sleek, modern aesthetic without compromising functionality.

Quiet and Fast Membrane Keys

The Membrane Key Switches provide long lasting and durable action, smooth to the typists touch, and do not attract as much dust and grime as other keyboard switches.

2X Print Size

The 2X size print on the keycaps provide excellent contrast and stronger appeal over traditional keyboards that have small, hard-to-read printing.
