

The Adesso Bluetooth® 3.0 Mini Keyboard 2000 is the perfect companion for your iPad™ and other Bluetooth enabled devices. This Bluetooth® 3.0 keyboard uses the latest wireless technology and is designed using a unique silicon material that protects your keyboard from unexpected spills and allows washing to eliminate germs. The silicon material also offers a faster and almost silent tactile response, so you can be productive without the extra noise. The keyboard includes a standard layout with iPad™ and Multimedia Hot Keys to access your iPad's shortcuts with one-touch. Along with all these great features, this keyboard is also compact and portable, so you can take it everywhere.

■ Bluetooth® 3.0 Wireless Technology

The new Bluetooth® 3.0 wireless technology offers an instant connection to your iPad™, plus lower battery consumption, higher security encryption, and 8x faster transmission speed than Bluetooth® 2.0, with a wireless distance of 30 feet.

■ Water Resistant, Silent and Fast

The silicone material used in this keyboard will protect it against spills and let you wash it regularly to keep it germfree. Unlike other silicone keyboards, the rigid backing on this keyboard provides a fast response, while the tactile key switches are almost silent.

■ iPad™ and Multimedia Hotkeys

The iPad™ and Multimedia Hotkeys let you connect directly to your iPad™ and multimedia shortcuts with one-touch, giving you quick access to your most used tools.

■ Compact and Portable

This keyboard is thin and compact, measuring only 9" in length, so you can easily take it with you when you travel or with any iPad™ case.
